

Our web based seminars represent an efficient way for you and your team to develop practical knowledge, delivering expert advice and guidance to you when and where you choose. Simple webinars offer a low cost and time efficient training option. The online seminars and video library can be accessed from the internet, eliminating the need to take time out of the office and avoid expensive travel costs

The following are a small selection of the topics we can offer you and your company

- Package on Package PoP Assembly Process & Inspection
- PCB Assembly Failure Analysis - How to Do It?
- BGA Dye & Pry Inspection - How to Do It?
- BGA Optical & X-Ray Inspection Criteria
- Counterfeit Component Inspection Methods
- QFN/LGA Assembly & Inspection Criteria
- PCB Surface Finishes Selection & Process Issues
- Modern PCB Assembly Process – Management Overview
- Printed Circuit Board Manufacture – Management Overview
- Pin In Hole Intrusive Reflow - How to Do It?
- Ball Grid Array Rework – How to Do It
- Design for Manufacture Review Procedures
- Wave Solder In Process Control Procedures
- Lead-Free Temperature Profiling - How to Do It?
- Lead-Free Process Problems & Failure Modes
- Printed Circuit Board Problems & Failure Modes
- Monitoring & Comparing PPM Yields in Production
- Hand Soldering & Desoldering with Lead-Free Solder
